CYBERSECURITY ANALYST | SECURITY OPERATIONS | ICS / OT

PROFILE

Cybersecurity graduate and U.S. Army veteran with practical experience in security assessment documentation, risk and compliance work, network analysis, and industrial systems troubleshooting. Combines a B.S. in Cybersecurity with an A.A.S. in Mechatronics Engineering Technology. Uses security labs and competitions to build hands-on skills in traffic analysis, vulnerability assessment, log review, and incident investigation.

TECHNICAL SKILLS

Security: Wireshark, Splunk, Nessus, Nmap, Burp Suite, Metasploit, Kali Linux; vulnerability assessment, log analysis, network traffic analysis, digital forensics

Systems & scripting: Windows Server, Linux, Active Directory, virtualization, Python, Bash; AWS and Azure fundamentals

Governance & industrial: NIST CSF, FTC Safeguards Rule, written information security plans, vendor risk documentation; PLCs, sensors, hydraulics, pneumatics, ICS / OT fundamentals

CYBERSECURITY EXPERIENCE

Cyber Assessment & Compliance Work | May 2025 - Dec 2025

- Supported written information security plan and policy documentation aligned with the FTC Safeguards Rule and New York DFS cybersecurity requirements.
- Reviewed security assessment materials, vendor correspondence, and evidence for small business compliance work; documented findings and follow-up needs.

Security Projects & Competitions | UNCW and independent labs

- Analyzed network traffic and security artifacts using Wireshark, Splunk, Nmap, Nessus, and Kali Linux in coursework, home labs, and National Cyber League / NSA Codebreaker challenges.
- Practiced Windows Server hardening, Active Directory administration, access controls, and Linux security configuration in virtualized lab environments.
- Researched image-based steganography and digital forensics using Steghide, Binwalk, and Python; participated in a simulated bank penetration test at InfoSeCon.

PROFESSIONAL EXPERIENCE

Freedom Sailing | Chief Operations Officer | Jun 2021 - Present

- Coordinate operations, scheduling, logistics, volunteers, and partner communications for a nonprofit providing free sailing trips to veterans and first responders.
- Develop organizational documentation and operating processes to support continuity, accountability, and safe execution.

IVP Forest Products | Senior Machine Operator / Industrial Controls Support | 2017 - 2020

- Troubleshoot production equipment, motors, sensors, hydraulic and pneumatic systems in a safety-critical manufacturing setting; supported corrective action and equipment uptime.
- Worked with controls personnel during modernization of a 225-foot log line, contributing operator input on HMI functions and equipment behavior.

U.S. Army | Infantry Team Leader / Battle NCO | May 2004 - Nov 2012

- Led personnel and coordinated missions during two Baghdad deployments; applied risk assessment, clear communication, and accountability in time-sensitive operations.
- Served in a 24/7 Base Defense Operations Center in Kuwait supporting force protection for an installation of more than 9,000 personnel.

EDUCATION & CREDENTIALS

University of North Carolina Wilmington | B.S., Cybersecurity, May 2026

Cape Fear Community College | A.A.S., Mechatronics Engineering Technology

Former Secret clearance; reinstatement in progress. | CAE-CD certificate of achievement
